

# EnduraPost Square Pickets & Droppers

Made to AS/NZS ISO 14021 standards

Our Australian made 100% recycled plastic square pickets and droppers have been in development since 2020, tested and released in January 2023. They are available with or without 14x7mm pre-drilled holes that match the hole patterns in common steel pickets. Whilst they can be sold individually, they are manufactured into packs (slings) of 200 that are strapped with pallet feet for ease of loading/unloading & stacking.

They are lightweight yet solid, flexible yet strong enough to drive into most ground conditions using common picket drivers such as manual, motorized, pneumatic and hydraulic hammer style drivers.

- CORROSION FREE**
- MAINTENANCE FREE**
- PEST & DISEASE FREE**
- FULLY INSULATED**
- UV STABILISED**
- HIGH FIRE RATING**
- RECYCLED PLASTIC**
- 100% SUSTAINABLE**
